

## About us

Healthwatch Rotherham wants to make health and social care services better.

Health care services are things like:

- Doctors

- Dentists

- Hospitals

- Pharmacies

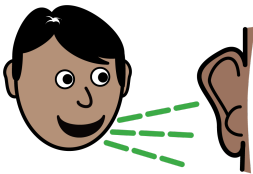

Social care services are things like:

- Care homes

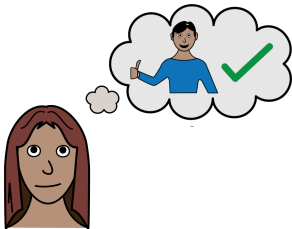

- People who come into your home to care for you

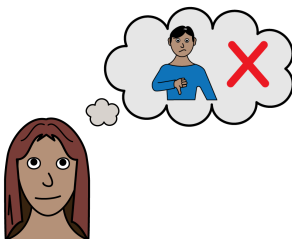

We would like to hear from you if you have used any of these services.

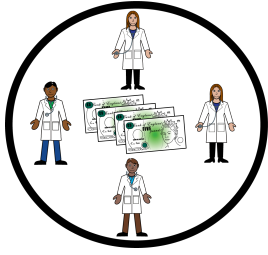

We would like to know:

- What was good

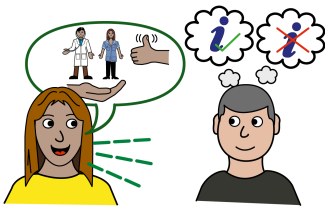

- What could have been better

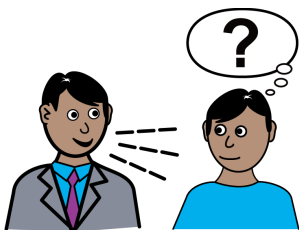

We will then tell the people in charge of the service what we have heard.

This helps the people in charge know what is working well and how they can make things better.

Healthwatch Rotherham can also give you information about health services.

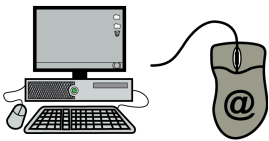

We can also tell you who you need to speak to or where to look for help.

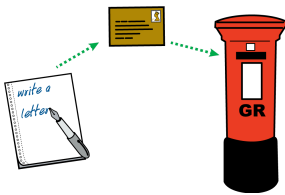

## You can contact us by:
