

Spotlight Shares – June '23

Over the last few weeks Healthwatch visited:

- Mature Millers Walking Football Group
- The ARK cafe
- St Helens Church Coffee morning
- Hellaby Craft Club
- RUCST - Coffee morning

Here are some of the things you've shared with us....

"There is a lack of awareness when it comes to Fibromyalgia - my doctors were too quick to just give me medication with no explanation about the condition"

"I'm getting frustrated as my medication review keeps getting cancelled with my ADHD nurse"

"I can't fault Rotherham Hospital and my GP surgery, Treeton Medical Centre. My husband had a brain tumour and this was detected and operated on within a couple of weeks"

"I'm not happy giving my medical symptoms/issues to the surgery reception staff. I'd be more confident if qualified medics took this information instead"

"I don't feel that different departments within the hospital communicate effectively enough - for example, I'm not sure who is coordinating my care due to multiple issues"

"CBT provided by IAPT really worked for me - a great service that has really helped improve my mental health!"
