

Spotlight Shares

Over the last couple of weeks Healthwatch visited:

- Rotherham hospital
- The unity centre Kashmiri and Yemini group
- Rotherham minster older people's day event
- Hygge cafe knit and natter group

Here are some of the things you've shared

"When we call up our GP practices sometimes we think we are ill but actually we just want someone to talk to. The asian community don't understand what a community hub is, there needs to be more information about this available "

"My dentist in Dalton has been great, I've been going for regular visits every 3-4 months and had no issues"

"There needs to be more in person information on mental health"

"The Rotherham health app is poor. I found it really awkward to use. I.T should be straight forward."

"We struggle for appointments at our GP surgery, we will call up at 8am but at 10 past 8 it's all full. Also, when doctors say they will call you back in a few hours, they don't specify a time"

"I can't fault Rotherham hospital. I've had two knee replacements, a pacemaker fitted and the staff from the cleaners up were brilliant."
