

Spotlight Shares....

Some of the groups we visited this month:

Rotherham Hospital

MCVC

The Mature Millers

Shiloh

Here are some of the things you've shared:

"I am still only being offered phone appointments at my GP surgery and I'd really prefer to see my doctor face to face"

"I had a recent stay in AMU in the hospital. It wasn't a great experience as during the night I had to help a patient with dementia who was distressed and wandering around - there didn't seem to be any staff around"

"I've been really impressed with my doctors recently. I rang for an appointment and was offered one the same day. I couldn't make the initial appointment time as I didn't have enough time as I travel on public transport and so they offered me one slightly later. Very impressed with Clifton Medical Centre."

"There seems to be communication issues between the GP surgery's and the pharmacies - my prescription is never right recently"

"I received correspondence from my GP saying I had an ankle fracture recently - only to be told at A&E at the time, it would mend and just to take pain relief, no mention of a fracture!"
